

TANYA CHAI

BUSINESS SYSTEMS ANALYST | CRM, DATA & PROCESS IMPROVEMENT

Kansas City Metro | tanyakchai@gmail.com | [linkedin.com/in/tanyakchai](https://www.linkedin.com/in/tanyakchai) | tanyakchai.github.io

PROFESSIONAL PROFILE

Business systems analyst who turns complex operational needs into practical systems, cleaner data, and repeatable workflows. Experience spans business analysis, CRM and Microsoft business applications, data engineering, project delivery, mortgage operations, and small-business ownership. Known for connecting stakeholder needs to requirements, system configuration, reporting, documentation, testing, and measurable process improvement.

CORE EXPERTISE

Business analysis: Requirements gathering, stakeholder communication, process mapping, gap analysis, functional documentation, UAT, traceability, training and SOPs

Microsoft ecosystem: Power Platform, Dynamics 365, Dataverse, Power Apps, Power Automate, Power BI, Microsoft 365, SharePoint, Forms

Data and operations: Excel, SQL, relational data, data cleaning and validation, dashboards, KPI reporting, financial and operational analysis, workflow improvement

PROFESSIONAL EXPERIENCE

Branch Operations Lead / Systems Analyst | Luminate / Princeton Mortgage Dec 2024 - Mar 2026

- Built and configured a Dynamics 365 CRM environment with tables, fields, forms, views, business rules, business process flows, security, dashboards, and email synchronization to support lead, contact, referral, and loan workflows.
- Gathered requirements from operational stakeholders and translated recurring pain points into practical Microsoft business-application workflows, automations, documentation, testing, and user guidance.
- Analyzed pipeline, P&L, revenue, expense, and operational data; created reporting for leadership and used findings to improve handoffs and reduce loan turnaround time by 14 days.
- Maintained a 1,000+ contact client database, improved data quality and follow-up visibility, and supported day-to-day branch operations across the loan lifecycle.

Loan Originator Assistant | Armed Forces Bank Aug 2023 - May 2024

- Coordinated mortgage files from intake through closing, completed pre-underwriting reviews, tracked conditions and milestones, and maintained accurate loan data across Encompass and related systems.
- Partnered with borrowers, loan officers, processors, underwriters, and third parties to resolve documentation issues, improve handoffs, and keep time-sensitive files moving.

Founder / Business Solutions Consultant | Chai Modern Business Solutions 2026 - Present

- Help small-business clients translate business needs into practical customer experiences, digital tools, workflows, brand systems, and implementation recommendations.
- Delivered a client engagement for Kenzie's Cookies spanning brand identity variations, packaging and print concepts, website direction, and point-of-sale recommendations.

Owner / Operator | Retail & E-commerce Businesses (sewKC + The Gift Loft) Jun 2015 - Present

- Built and operated retail and Shopify-based e-commerce businesses, managing product selection, inventory, pricing, merchandising, fulfillment, customer service, marketing, and day-to-day operations.
- Used sales trends, product performance, customer behavior, and margin analysis to guide product mix, forecasting, restocking, and pricing decisions, with a target gross margin of 45%-50%.
- Launched The Gift Loft in November 2024 and built its brand, storefront, customer communications, packaging, reporting, and repeatable operating workflows end to end.

EARLIER EXPERIENCE

Project Manager / Data Engineer | Iris Data Services

Oct 2007 - Dec 2011

- Progressed from data engineering into project management, owning client work from technical intake and statement of work through processing, quality validation, reporting, and delivery.
- Processed, cleaned, transformed, and ingested large legal eDiscovery datasets; worked with relational structures and troubleshooting workflows to protect data quality and delivery accuracy.
- Translated client and legal-team requirements into technical plans, coordinated priorities and deadlines, communicated status and risks, and documented repeatable delivery processes.
- Balanced multiple concurrent projects while resolving data issues, reducing rework, and maintaining client confidence in high-volume, deadline-driven engagements.

Career Break & Family Caregiving

2012 - 2015

- Took a planned career pause for family caregiving before returning through entrepreneurship, e-commerce, and operations work.

Database / Program Specialist | H&R Block

Jun 2001 - Sep 2007

- Built and maintained Microsoft Access databases, queries, and reports supporting program operations, data quality, and leadership visibility.
- Gathered business requirements and mapped FINRA and operational rules into database logic, use cases, test cases, and repeatable program processes.
- Automated reward calculations and recurring reporting, reducing manual effort and improving consistency and auditability.
- Created user documentation and training materials and supported business users with troubleshooting, process questions, and system adoption.

SELECTED PROJECTS

VeriVault | Independent AI-assisted product development

2026

- Designed and built a working career-management web app that creates an evidence-backed skills inventory, analyzes job descriptions, supports resume tailoring, and tracks applications without inferring unsupported claims.
- Developed the project charter, 34 functional requirements, business rules, solution architecture, test strategy, UAT cases, traceability matrix, and enhancement backlog; validated the workflows in a responsive HTML prototype.

Kenzie's Cookies | Client brand and business systems engagement

2026

- Created a flexible family of brand identity variations and extended the system into packaging, print, web, and customer-touchpoint concepts while protecting confidential client work.
- Connected brand decisions to practical business needs, including website content structure and point-of-sale considerations for a growing custom-cookie business.
